

IMPORTANT DRAWDOWN INFORMATION FOR 2022 WINTER SEASON

On Monday October 3, 2022, Douglas Conservation Commission voted to approve our NOI for our Operations and Maintenance Manual which allows our ability to Operate and Maintain the Whitin Reservoir Dam. Within this document is our plan for Winter Drawdown Operations.

Drawdown Operations will be as follows:

Begin: **October 15th 2022**

Daily reduction target rate: **2" to 2.5" per day, = 6' total reduction**

Target completion: Approximately 32days (3rd week of November)

!!Volunteers Needed!!

On another note, as part of our Orders of Conditions, we have to do a once-a-week observation of some TBD sites over the winter drawdown periods, on the East Cove (Smaller Basin). So, we are in need of Volunteers, preferably from the East Cove, but not limited to, Full-Time Reservoir Residents, willing to contribute to this important project for our Reservoirs Permit sustainability. If interested, please contact Paul Caouette 774-254-2795 ASAP so that we can discuss project protocols.

Thank You

Paul Caouette

Whitin Reservoir Water District (Chair)
